

[PIVOTAL TO SUPPLY LNG TO CARIB ENERGY](#)

Pivotal LNG and Crowley execute another LNG supply contract for a pharmaceutical company in Puerto Rico

ATLANTA – Feb. 13, 2018 – Pivotal LNG (Pivotal) executed another multiyear contract to supply liquefied natural gas (LNG) to Carib Energy (USA) LLC, a subsidiary of Crowley Maritime Corp. (Crowley), for a major pharmaceutical company’s energy needs. The LNG will be transported by Crowley from one of Pivotal’s LNG supply points to the pharmaceutical company’s facility in Puerto Rico.

“Pivotal and Crowley continue to work together to expand the delivery of LNG to companies in Puerto Rico.” said Tim Delay, vice president of Pivotal LNG. “Liquefied natural gas is a clean, domestically produced alternative fuel that is being used by multiple industries to reduce emissions and energy costs. This transaction serves as another example that the partnership and the virtual LNG pipeline we have created with Crowley delivers an economic, reliable and environmentally friendly fuel to the island.”

As with Pivotal’s existing LNG contracts with Crowley, LNG is loaded into Crowley’s international shipping organization (ISO) containers at one of Pivotal’s LNG supply sources in the southeast. These ISO containers are transported via truck to Jacksonville, Florida, then loaded onto Crowley-owned marine vessels bound for San Juan. Crowley then delivers the LNG to its customers in Puerto Rico. Once operational, Pivotal expects to source these LNG volumes from the JAX LNG plant that is being jointly developed with Pivotal’s partner, Northstar Midstream, in Jacksonville. JAX LNG is a new, state-of-the-art liquefied natural gas facility and will be North America’s first coastal LNG facility with marine and truck loading capabilities.

“We are thrilled to enhance our relationship by continuing to grow our LNG services and volumes with this critical customer in Puerto Rico,” said Crowley’s Greg Buffington, vice president, LNG. “Crowley will continue to provide an uninterrupted supply chain of natural gas to the customer’s site, just as we have done since 2014, helping them utilize a safe, reliable and environmentally friendly fuel for their operations.”

Pivotal LNG and Southern Company Gas operate a network of LNG production facilities with the capacity to produce over 554,000 gallons per day and the ability to store more than 96 million gallons. Pivotal, through its JAX LNG partnership, is developing an LNG production facility in Jacksonville, Florida. The JAX LNG facility is expected to be in-service by second quarter 2018.
