

PIVOTAL LNG EXECUTES LNG SUPPLY CONTRACT WITH NASA

ATLANTA – March 20, 2018 – Pivotal LNG (Pivotal) made its first delivery of liquefied natural gas (LNG) to the National Aeronautics and Space Administration (NASA) after earning the award to serve NASA’s Marshall Space Flight Center (MSFC) in Huntsville, Alabama last fall.

“We are proud to have earned the trust and confidence of NASA to serve the historic agency,” said Tim Hermann, president, Pivotal. “It was a pleasure to work closely with the John F. Kennedy Space Center, who contracted the solicitation, and the MSFC professionals to understand the agency’s exclusive schedule of supplies, commodity specifications, and contracting terms.”

Pivotal is part of Southern Company, American’s premier energy company, and is a subsidiary of Southern Company Gas. Together, Pivotal and Southern Company Gas operate a network of LNG production facilities with the capacity to produce over 554,000 gallons per day and the ability to store more than 96 million gallons. Pivotal, through its JAX LNG partnership with NorthStar Midstream, is developing an LNG production facility in Jacksonville, Florida. The JAX LNG facility is expected to be in service by the second quarter 2018.

About Pivotal LNG

Pivotal LNG is part of Southern Company Gas, a wholly owned subsidiary of Southern Company (NYSE: SO). Pivotal LNG provides liquefied natural gas to companies and industries throughout the United States through reliable, flexible and cost-effective solutions.
